DETAILED ACTION

Election/Restrictions

Applicant's election of the group I invention and species A and C, without traverse, is acknowledged. Claims 3, 4, 12, 13, 16 and 17 therefore stand withdrawn from further consideration as being drawn to non-elected inventions and species.

It is noted that applicant intends to cancel claims 12, 13, 16 and 17. However, claims must be canceled according to the procedure as set forth in 37 CFR 1.121.

Specification

The disclosure is objected to because of the following informalities:

On page 3, line 7, "III-III" should read --3-3'--.

On page 6, line 1, it would appear that "Figure 5" should read --Figure 2--.

On page 7, line 3, it would appear that "Figure 5" should read --Figure 4--.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: there is no basis in the specification for "outer boundary member" and "inner boundary member" of claim 1.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: L_{dm} and r_{oiob} .

Art Unit: 3746

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: r_{oib}.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Appropriate correction is required.

Claim Objections

Claim 9 is objected to because of the following informalities: in line 2, --axis—should be inserted following "central". Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 5 to 11, 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP

Art Unit: 3746

§ 2172.01. The omitted structural cooperative relationships are: the flow deflecting member is not structurally connected to any other structure. Also, in claim 10, it is not understood how the flow deflecting member can be disposed within the second portion.

Claims 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites a “radial distribution of fluid”. However, it is not clear to what physical parameter of the fluid the radial distribution refers. For example, is it pressure, temperature, velocity etc.?

Claims 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: no structure is recited which would induce first and second pressure drops. A “flowpath” is not structure.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 to 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuzyk (US 3,058,302). Kuzyk discloses an outer boundary member 21 and an inner boundary member

Art Unit: 3746

18 which define a flow path therebetween. A flow deflecting member 26 is disposed in the flowpath. The flow deflecting member 26 will change the velocity profile of the exhaust gases.

Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Newton (US 4,731,991). Newton discloses an outer boundary member and an inner boundary member which define a flow path therebetween. A flow deflecting member 39 is disposed in the flowpath. The flow deflecting member 39 will change the velocity profile of the exhaust gases.

Allowable Subject Matter

Claims 2 and 11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
